S'C Down, S5 Per Monta.

To those who suffer from poor tenements, high rents, crowded streets, there are a few facts worth considering in connection with beautifu West Port and Park. You wold city tax and water tax, and get your fuel at one-half cost. You get good puro water and live above the malaria belt. Your payment on you: lot and house each month will not amount to what your rent does now. You are simply purchasing your home by paying your rent; you will have enough vacant room on you lo; for a 'titelien garden; you can keep chickens and a cow, if you see fit to do so; you will not be compelled to live on the second or third floor, and let your wife wreck her constitution climbing up and down two or three pair of stairs. In comparison you are no further from West Portland Park, wit a motor road, than from Twenty-first street to the bridge by street car, while it will be a much more confortable way of traveling, with less time and only 5 c.nts fare. West Portland Pa k is within what must be the limits of the city of Portland in the near luture. There are no high hills to scale, no rivers with their draw bridge hinderances to pass in reaching the Park. When there you do not have to keep your eye on it in fear of a changing surface from shifting sand, or impassable from marshy bottom, or difficult of grade and cultivation from ledges and ro ka.

A BEAUTIFUL, FERTILE, DRY HEALTHY TABLE LAND. These lots can be purchased on the in tallment plan, or by paying cash for a lot a cottage will be put upon it, if desired, and payed for by monthly payments less than the rent of the same tenement would be in the city. The owners and manager of this beautiful residence spot intend to make it the choice suburb of the city of Portland.

# WEST =PARK===

A rich, beautiful tract of table land seven hundred (700) feet above the Willamette. Beautiful Parks, with mireral springs, shade trees and macadamized walks. A building society in operation erecting cettages and stores for rent or sale. A motor line is being constructed, to be in operation by May next, with 5c fare. Only 500 of the 3700 of these lots are placed on the market at a quarter of their value. These lots are sold on the installment plan, with easy payments, or a liberal discount for cash. A special arrangement will be made with parties purchasing one or more blocks.

A carriage will be in waiting with intelligent and gentlemanly, salesmen to snow parties these lats, the work being done by the builders' association and the motor-line.

effectly sale to predict with the rapid growth of Portland, and the marked Jvantages West Portland Park has by reason of its location, motor line and Buile as Association, lots there will be worth live hundred (\$500) to a thousand dollars (\$1000) within the next year. Portland is by all odds the leading city of the great and prosperous Pacific Northwest; it is the great money center; it is the great money center; it is the great money center, and while it thes not blow as many boom trumpets, or blow them as loud as some other cit is, yet in its increase of wealth, population and business, it advances every yestermore than the combined growth of all the cities of the Pacific North-In the last year the valuation of Portland increased nearly eleven million dollars (\$2,000,000), while within the last nine months the building and improvements has reached the marvelous sum if eleven mill on dollars (\$11,000,000). No. better judges of places for investment are known than rhilroad men; and it speaks with crop lasis for Portland real estate when it is known that within the last six months more than four million dollars (\$4,000,000) live been invested by them in real estate in and around the city of Portland. West Portland Park is one of the most beautiful and bealthy locat one around Pertland. It is suic to say that opportunity as West Portland Park offers to investors of moderate means with are seeking a safe and profitable investment has never been known in all the great opportunities of the Northwest. The civil engineer who surveyed the tract of land (and he is one of the best in the city) says it is the most (esignile tract of land for residences be has ever surveyed.

Best investment on the large.

A careful is vestigation of the situation which exists on Bellingham Bay to day will convince any shrewd man of affairs that the foundation of a great city has been haid at Fairhaven and that the work to that end has begun in samest. Natural resources (coal) from lumber and figurications are there in inexhaustible quantities; at has an incomparable harbor; great mills are building; rows of brick buildings, including a magnificent hotel, are being erected; miles of strees are being graded and sidewalks laid; new industries are springing up and new lines of business are being opened every day. Shipping is increasing every hour. Peoplegare flocking there by the thous sands and the tributary country is settling with a phenomenal rapidity. Fairbayen has two airboads building in different directions. The town is, moreover, backed up by a powerful land company that is appending and developing it on liberal and broad gauge principles. Any sagacious person, who will caliny look the situation over, can not full to recognize the fact that the history of Tacoma is to be repeated at Fairhaven.

EAST FAIRHAVEN ADDITION is less than a mile back of the town

EAST FAIRHAVEN ADDITION is less than a mile back of the town and commands a beautiful view of the town and bay. Streets are 80 and 100 fost wide and correspond with the streets of Fairhaven. Donovan avenue, 88 feet wide, is being improved its entire distance, from Fairhaven through East Fairhaven, and planked, and will be the main theorophiare from Happy Valley and the outlying add tions.

Prices of lots, \$125 for inside, and \$150 for corners, one third cash. For plats and particulars seo

THEIR OWN, CHOICE

A very singular doctrine is proclaimed A very singular doctrine is proclaimed through the Pendleton East Oregenian, manely, that men like "Sandy" Oils are "the product of a system." This is equivalent to making the assertion that for the coreers of such men the "social organism" has trainf, not the men themselves.

But are min of this sort really "the products of a system?" Rather are they not the corators of the content that not the

studes of a system. Takener are they not the creators of the system, that is of the mode of life in which they live and move and act? Ecceety in fact does not make their system: they nake it themselves, and they adhere to it and live in it, because it

Buckle is a very vigorous and attractive writer. His celebrated book has lost much of its former vogue, but still is widely read Its theories are put in a dogmatic and for-cible way, and hence by those who read them for the first time are frequently taken for absolute truth Buckle is the great apostic of the dca that man is altogether a creature of his "social environment," and he carries this dogma to the extreme of contending virtually that man has no control over his own way of life but? whe sjanually want the 'system' by which he is surrounded makes him The fundamental error of this pallosophy consists in the as sumption that man has no volution, he independence; that if he goes to the had it is be-cause the evi social forces around him do not allow him to choose a good way of life. The better way, the sensible thing, is to tell him that it shis duty to avoid to get out of the cyil "social environment, by hose paths lead to dishonor and death. ### A SCOUNDREL PUNISHED

The brief newspaper career of John J West, whose name once neuroed the place once graced by that of Wilbur F Story at the head of the first column of the courth Page of the Chicago Itines, finds a fit bulmbration within the walls of a pentientiary Rissentence to five years' imprisonment for fraudulent over-100 ne of stock tells only a fraction of the dismal history of the Times nation of the definition of the Jaw has reached and punished one only of many infractions of morality and professional ionesty. The history of West's connection with the Times is almost unique. There have been unworthy newspaper editors and pub ishers before now but never one who succeeded in so short a time in glevating his unworthiness upon so conspicuous a pedestal. West had no training or preparation for the cal-fing of journalism. He made a good deal of money cas ly us a new-dealer in Chrongo and concerved the notion of securing control of the Times and becoming an editor. He interested with him in the enterprise some business men of Iowa whose confide ice be had gained and whose imagination be had dazz ed by his rather remarkable success in establishing and conducting profitable news agencies. These gentlemen believed that they were to be associated with West on something like equal terms in the conduct of the Times, but hey were soon undecatives. West took both the editorial and business management into his own hands, put his name up as editor began to make merchun disc of its news and editor it, and scon got its finances into a mysterious tangle of which his partners could make nothing even when they were permitted to inspect This went on two or three years, the odor of blackmail all the time g owing stronger about the editornal rooms shadow of bankruptcy growing blacker in the business office. The furth partners en-Annal the situation with marvelous principle until the Times was threatened with the shoriff Then they plucked up courage and began the egal proceedings which ended in begin the ega proceedings which shall be well to five years' imprisonment. This result is satisfactory in many wave. It is always conforting to see crime punished as it is to see yirlle rewarded. It is particularly so when the crime compromises not an indi-vidual alone but a generally worthy and vidual alone but a generally worthy and honored calling. The prompt conviction and sharp punishment of West maks the singularity of the conduct that won him punishment. It is a good thing to advise people, in and out of journalism, that fraud and blackmall cannot be practiced with

## A PRACTICAL QUESTION,

One of the humors of the perpetual silver campaign is he distress of the silver mines country their attorneys and organs on account their attorneys are account to the perpetual silver their attorneys are account to the perpetual silver their account to the silver th count of the supposed scaracty of money in the country. Mr Morris Daley the richest of the Montana mine owners, pays the bills of a certain paper in Anaconda, which hes awake rights to lament the unhappy condition of the people of the country who have not money enough to any their debts.
"The silver question," says the Aniconda
Standard, "13 not an issue between the silver mine owners and the government, it is ver nine owners and the government, it is an issue between the great debtor class of the country and the bondholding oligarchy. That is to any the sole object of the people who want free coinage of silver, is to make money pienty and cheap so that people can pay their debts and the sole object of those who resist it is to make money scarce and dear so hat the bondholders can go on dear so hat the bondholders can go on swindling the faces of the poor This is a familiar argument in the mouths of the shallow contingent of silver men, bla Bland of Missouri, who were recruited from the old greenback school but it comes with an ill grace from the paid advocates of the saver maying industry who know better and whose business it is to know better

The truth is the cheap money craze has shout died out The greenback fiat money peo ple are at out all dead or silonced, and the the oreheat silver cranks have about all follower them The silver question has outlived the sentimental stage and only holds its own now as a practical operation The United now as a practical question the office states a large producer of silver, and it is prudent o do all that can safely be done by legislation to maintain a market or and keep up the price of the product. Practica legislators believe that this can be done by reasing the use of silver as a money tal wi hout abandoning the golds and are or degrading the va un of the current; bases on it. The e views are entitled to contion, and are receiving it at the bands of congress and the secretary of the treasury That is all that is left of the silver question outside of a small ci cle of orunks, a meager survival of the old greenback party. The proclical silver men thomselves do not urge free comage on the ground that there is a currency famine. They could hardly do this with the national they could intruly do this with the intensity before the eyes wilhous of legal tenders lying idle in the treasury and the national depondence surrendering their deposits. The late silver convention at St Louis did not propose to but only to substitute silver and silver cer tificates for legal tenders and national bank notes the 1s, to increase the market for stiver without increasing the volume of the currency The anti-stiver people who are willing to Lecoett Mr Windon's plan as a compromise, look at the question from pre-

\* elsely the same point of view. They are willing to make a market for our silver pro-luct in the colonge, if it can be done with manual eafety. The silver querion is oursely an issue between the mine owners and the government, and the farmer will get more profit out of the discussion if it is strictly confined to these limits

### AN UNLQUAL BIRUGGLE.

The report that Hon Samuel J Bandali is seriously, if not fatality ill, casts a gloom over that portion of the democracy that PERSONS WORTH KNOWING ABOUT recognizes in him a leader. The purby is still bewildered by the sudden death of S S Cox, and the fact that it lacks leaders in con gress is painfully apparent. Mr Randall's day in that body is conceded to be over, and an attempt to prolong it by his feeble appear ance in his accustomed seat would only ex

cite pity

It is vain for the mental to strive for recog nition among men after physical strength has departed. The puriful spectacle pre-sented by Allen G Thurman on the stump during the last presidential carvass, and the more recent state campaign in Olio witnessed the foliy of such attempts. It is posnesses the fony of auon attempts 11.75 pos-sible, indeed, that a man may keep bimself alive by will power" for a time as it is al-leged Randall is doing, but the inequality of the struggle is 100 separont, and the final trumph of disease over burnar resolution is so certain that it may well be questioned whether temporary triumph is worth the painful effort that it costs

So, also, with the man upon whom disease has se-cured a fatal heid but who, in his auxiety to nve, battles death back for a brief term of weeks or months by the strongth of his will lit is a doubtful quality of humanny that re-potees in his triumph from day to day, knowing that the end must soon come and a genume pity that breathes ultimately a sigh of relief when the strife is over

It is gratifying to learn that an effort will be made to bring the postal facilities of the Northwest up to the requirements of its rapid growth. Suder the Cicreland adminthe "reform" record up by cutting down the postal service in this region, and notwith standing the loid complaint that was made to bring the "reform" record up by cutting down the postal service in this region, and notwith standing the loid complaint that was made this partisan system of retreachment and reform went on throughout the entire term. This section was, in the meantime growing rapidly in population. Demand was necessing and supply diminishing, while the democratic posed officials by close figuring kept the expenses down and the wrath of the people up Whatever may be said of Postmaster-General Wanamaker's peculiarities he is business man enough to recognize the fact that the postal department of the government is maintained for the convenience of the people, rather than for the giory of partisans, yearning for a "reform" record, and as a consequence, a little more expense or a little less front to the government and a great improvement in the postal facilities of the country are noted

Besidents along the several possible and probable routes of the 'Salem to the Sea' railroad are entanguastic in desiring the rond to pass their way and profess them-selves in many instances alixious to sub-scribe to the stock of be company. Indeed, it is plain that if enthusiasm were all that is required to build and equip a rollicad, cars would soon be running on the proposed line, across comebod) s pasture lands end grain fields over the mountains and on te the sea Enthusiasm is a powerful lever in getting an enterprise of this kind started, however, and the interest that farmers and villagers in Polk and Yambill counties are manifesting in the scheme argues well for its success Oregon needs all the local railway lines that the little that it without the little that it without the little that it without the little that it is the lit Its likely to be within the next decade. It may or may not be a calamity to be aged. That depends entirely upon the good works that the man has put on record through the available years of his existence to be aged and homeless us a calamity of a type so unmistakable that its subject arouses the pily and uvolces the protection of humanity, but to be aged poor and in sane forms a combination of wee that stres the deeps of human compassion to the utremost Such was the condition of S. H. tremost Steh was the condition of S H., Oliver who was committed to the mean a sylum at balem a few days age He is 30 years old homeless and unknown Imagination even in his insanity however is more beneficent to him than fortune has been, as it endows him with lands, makes him the possessor of untold wealth and honors him as a great physician. So per to him as the only possible kindness that fate had left it store for him—a doubtful fate had left it store for him-a doubtful recompense for defeated hopes and vain aspirations

The form of the advertisement of Secretary Windom for bids for the right to take seals in the Alaska islands is the same as that heretofore used, except that the num that heretolore used, except that the fun-her of scals that may be taken in the year ending May i, 1891, is reduced to 60,000, and the secretary reserves the right to fix a still smaller limit for subsequent years. This caution on the part of the secretary, taken in connection with the reported dissalistaction of the Alaska Commercial Company with the recent results of their contract and their rumored intention not to appear again as a bidder, goes far to confirm the general impression that the Alaska scal fisheries are approaching exhaustion. This makes if more important than ever that some international agreement shall be speedily reached for the protection of the fisheries from unl consed ravages and the maintenance of what has become nearly the only productive fur bearing region of the Northern hemisphere

Work in the pension office is being rapidly and thoroughly systematized under Commissioner Raum From reports of the chaotic condition in which he found the records and the husiness of the office generally, it would seem that an incessant talker in that position was not succeeded any to soon by a systematic worker. WHY "THE OEEGONIAN" WAS DELAYED A Slight Accident to the Press Which Required

Time to Repair Was the Cause.

A slight accident to THE OREGONIAN'S pross, which, however, required some time to repair delayed the issuing of the paper yesterday morning several hours. The commetten caused by this was very flattering, but by the time a few hun dired subscriber had called to learn what was the matter, and far equal number had telephoned in to know why they had not received the risport, the matter became somewhat wearisome philosophical persons atter looking for their pares several times, derived comfort and unuse mentifrom watching their neighbors as they came out in the frost in their slappers and looked in their boxes and around the sleps and proches and among the shrubbery for the miss ug papers, and thou up the street to see if the carrier was coming. An accident of this kind causes an royace to a great many but to none so much as the publishors of the paper. This is the first time on accident of the kind has occurred in The Ora coverant office for the years and it is hoped it will not occur again for a longer puriod.

### A BIG HOTEL FOR ASTORIA

It Will Cost \$100,000 and Will Be Opened by Next July

Astoria is going to have a big hotel to accommodate the thousands who are expected to visit the city next year. Last Saturday a committee called on a number of business men and urred the ne tessity of building a \$100.000 hotel at once. Be fore they had in the had their rounds three fitths of the precisery? affourt was raised and a company is to be incorporated and stock books opened. The plans of the company are business like, and the intel will be built and obened by July it not sooner. The capital is to be \$100,000, divided into \$200 shares of \$300 cach. A suitable site will be purchased within a day or two, and in this competion the company purpose asking concessions in the way of price. With the buying of the be purchased within a day or two, and in this toninoction the company purpose asking concess toninoction the way of prices. With the buying of the site plane will be propared and then bids for building asked. The success of the enterprise is tasured, as only men of energy and progre are ideas have anything to do with it.

Among the subscribers, many of whom will take two or more shares are J. O. Hantborn W. Cliutter, G. W. Sanborn, William Loeb & J. ranchard, I. W. Case, J. C. Dument, B. VanDu, ten J. P. Halloran Samuel Elmore Rienry Jack, son, W. B. Adair, A. D. Bowen G. Wingate, and some fifty others.

### THE BOARD OF TRADE ROOMS, Will Be Opened To morrow-Increase of Membership-Econoraging Prospects

ship—Ennouraging Prospects

The Board of Trado rooms will be opened tomorrow, and hereafter Assistant Secretary Frank
Motter will be on hand from 0.A. M. to 4 P. M. to
fugnish all callers with any information in regard
to all matters coming within the purview of the
Hoard of Trade. In canvassing for additions to
the membership of the board it was found that
the scheme of keeping the board rooms open per
mapently meets with the general approval of the
business community. Mr. T. F. Osborne the
newly elected secretary of the board, studes that
130 business men have applied for membership
since the cantess was begun by Mr. Motter and
he expects the jumber will be increased to 150 by
the 1st of January. He is much eccouraged by
the liberal manner in, which the business men
have responded to the efforts of the board to
in crusse its used liners and he kopes to make the
new departure of the board a grand success.

-THE-

A careful investigation of the situation which exists on Bellingham Bay body will convince any shrewd mant of affairs that the foundation of a great of has been haid at Fairhaven and that the work to that end has begun in tenest. Natural resources (coal, iron) lumber and agriculture) are there in inchaustible quantities; it has an incomparable harbor; great mills are idding; rows of brick buildings, including a magnificent hotel, and being stiding; rows of brick buildings, including a magnificent hotel, and being stiding; increasing on and now lines of business are being opened every day. Sipling is increasing every hour. People are biolocking there by the thousands and the tributary country is settling with a phenomenal rapidity. Fairbane has two railroads building in different directions. The fown is, moreone, backed up by a powerful land company that is nursing, building and descholing it on liberal and broad gaug; principles. Any sagacious person, who is calculy look the situation over can not fail to recognize the fatt that the Lisay of Tacoma is to be repeated a. Fairhaven.

EAST FAIRHAVEN ADDITION is less than a mile back of the town are commands a benutiful view of the town and bay. Streets are 30 and 100 by wide and-correspond with the structs of Fairhaven. Donovan avenue, 85 wide, is being improved its entire distance, from Fairhaven through the Fairhaven, and planked, and will be the main thoroughfare from Happy view and the outlying additions.

Prices of lots, \$125 for inside and \$150 for corners, one-third cash. For plats and particulars see

### The Oregonian. PORTLAND, THURSDAY, DEC. 26.

A SILVER MINTR'S VIEW.

The arguments of Mr J T. Nelson, who discusses the silver question in a letter printed elsewhere in The Oregonian, shall receive the respectful consideration to which period of the attack.

The people of this state, usually so forful rankly for free colonge of silver in order to exceed the case of the state irunkly for free compage of silver in order to to make a market for the silver product of the Whited Stiles, matead, of whining hysterically about the necessity for more soncy in the country to relieve the necessithes of the deptor dress. Mr Nelson inkes peremptory issue with The Origonian, but the truth is that The Origonian looks at the liver question from nearly the same point of view as that of aimself and has assectates This is not only true of the Ork order, but of the Eastern so called anti-silver press, of the secretary of the treasury and of many Dastern, bankers, publicists and finan-cial students of the arthodox school hearly everybody who undertakes to a request he silver question or to pronose legislation on the subject gives fall would to the interests and the reasonable demands of the silver producers. The satisfaction of the services able demands is indeed the prolessiver cues ion. Reduced to its simplest aprecious 113 ho more than thus. How to create a significant market for an important commod 1, or which the United States produces over \$10,00,000 worth per year and whose on umption in the mechanical arts is limited i / making use of it as a money metal, with out depaying our present stands of of value ir disturbing on financial relations with that part of the world beyond the reach of

our legislative power.

This is the question which Secretary Will. ver product of the whole world, both present is certainly a fair statement of the free coin age proposition When Mr. Nelson says the United States has power by legislation to make 42½ grains of silver worth a dollar in gold, he means that it can compel its own citizens to accept it as a dollar. That is to say it can, and under free cominge would take from the namer or speculator 4234 And not only the American mine owner,

but the dealer or speculator in silver bullion any where Mr. Nelson cannot be more th in half serious in his proposition to keep out foreign silver by a protective duty. Does he, suppose his aires of the oberp money scrool could to erate this notion for an in stunt / It would seem monstrous to them to pretend to establish free comage for the ben to the mine owners by excluding foreign competition, to keep the promise of a cheap silver dellar to the ear and break it to the loope builting the value of the dollar by a protective duty. We should soon hear of for bugs " silver rings, consistances to piers to people and all the old francian The danger of a flood of cheap silver from abread is not exaggerated. Mr. Acison is mistaken in his statement that the United States produces three fourths of the silver in the world and here is no ground for his

conclusion that it has power by legislation to control us price. Out of 110 000,000 opuces of silver mined in 1985, only 45 000 60) came from the United States, 47 000 000 the rest coming from Mexico and South Arierica. Of something like \$7,000,000,000 Borth of silver, in ned from the discovery of America to 1851 Mexico and South America ve produced over \$3,000,000,000 and the sited States only \$425 514 610 A good deat this silver is now in existence, mainly in In di tand China ready to be drawn upon by free bsurd it is to argue that the United States can fix the price of silver by legisl; ion The price of silver for the world is fixed in London, and is governed by the rate of Indian he United States has not a monopoly of

Effect production The only monopoly it on give its own producers is an art final and unatural one at the expense of its own ouzers This will not be tolerated. What ult candor and friendliness we advise them to be satisfied with this. We advise them est coally, if they value the alliance of the c : cap money men in their crusade for silver c mage to abandon the notion of combifing the compulsory purchase of all the silver in the country by the government under a free coinage law with the artificial maintenance of a high price for silver by a protec tive taruff

## THE PREVAILING DISEASE

Russian influenza " la grippe," or n'hat ever the modical fraternity, sore presped for a name to suit the diagnosis of the disease that has ravaged Europe and crossed the docam to America within 'the past few weeks may be called as creating universal apprehensi not unmixed with alarm, on both sides of the Atlantic The disease appeared in New York about the middle of the present month, and a sanitary inspector was im mediately placed upon its track with orders to trace it, if possible, to its source. He found goven of a family of thirteen down with the discase or having partially recovered from it more of whom had recently returned from Lurope or nau come ... quitant with any recent arrival, or with any one tact with any one Several of the authering from influenza. Several of the family had however recently received let ters from Lurope. The first one who was ters from Lurope. The first one who was attacked had received a letter from Berlin the day previous and the other no obers of the family had been taken one on such suc the attacks were staden and were accom panied by chill faintness, headache and marked prostration. ## SUGGESTIVE INJUSTICE.

T ie declaration that the laborer is worthy of h s hire does not had indersement in the probate court of Cooper county, Kansas, if a decision recently rendered of that tribunal is to be taken as a sample of the quality of just ce that it dispenses. A colored woman, who (incredible as the story appears) had tould on in slavery for twenty-five years new r leaving heard of the decree of freedom that has made the parso of Abraham Lancoln immortal found out a few weeks ago that she had been unfaryfully held in unpare ser, tude all these years and instituted suit to recover wages for the period in which she had been thus degriged of the legitimate from pf her toil. Mr Taylor (Dem.) of Tennessee has introduced a similar bill and Mr Henderson (Dem.) of North Curolina has infreduced one to provide for the apportion ment of the appaintments among the several congressional districts on the busis of population. Mr. Boothinga busis of population Mr Baoth (Rep.) of Ohio comes to the with a very extraordinary plan Boothman proposes to have the commission keep three has of names of those who have present the examination for the classified service. Two of these lists will contain the names of republicans and democrats or whatever may be the leading tarties at the time and the be the leading parties at the time and the third the names of those belonging to other political parties. In making appointments names will be selected alternately from those on the republican list and the democratic list who I are prissed highest. But if my on the third list grade higher than those on the first two lists, the commission may use its discretion about selecting a name from the "other party"s, list. This infrom the 'other party's ' list genious gentleman probaby thinks his plan highly impartial, and 'ramed in the true spirit of civil service reform. In fact it contains the most glaring violation and contradiction yet exhibited of the civil service reform idea, which is to ignore party entirely and make appointment to office depend upon fitness alone. There will be a

the face of all the nations of the earth. It may not harm him at home. The people of Brazil are not very intelligent, nor their political leaders very discriminating. They may take l'ouseca's rhapsodic rant for patriotic elòquence. But his inflated clap trap is in sorry contrast to the decent dignity which niw we characterized the public ut terances of his royal predicessor.

Congressman Lodge, who is a very stir-ring young person, has an interesting scheme for relieving the house of represent-atives of the burden of deciding election contests. Lodge's notion is that these cases should first be taken to the courts and there decided upon the evidence and their merits of the house reserving the right to reverse the judicial decision when the cases come before it. The plan has a certain attractiveness but it is doubtfu if it would supe the house much time. The courts would do what is mow done in the committee on privileges and elections, and would do it in a more orderly and practical way—nossibly in a more imparitial way though the pleasing fiction of a non partisan judiciary has received some savere shocks of late years, but it is certain bat the house jealous of its perfogative of final judgment, would waste as much time to debuting cases sent to it from the court as it does now on those coming from its own committee, perhaps more. The best way to relieve the house of the labor of considering contested election cases is to reduce the number of the cases. This can be done by making contestants pay their own erpeases, instead of putting a premium upon contests by appropriating and the control of the control of them to the control of the decided upon the evidence and their merits the house reserving the right to reverse the judicial decision when the cares come before

Mr. Gross opened his Casino and only world remowaed, altractions would drew full houses. For instance when Denman Thompson, who is a first class a traction in New York citi, where he plays for two years one stretch at \$1000 or so a night was here, the whole week a business did not exceed \$1000. They turned on well of course, to hear Vr. Barrett, but he was considered by the theatrical managers about on the same basis as to drawing abilities as Henman Thompson, or Reland Reed, the popular New York comedian, whose business here was about 1400, or Neillo McHenry with the Trouba dones. Well, you see that with our low records on such emphanics, they require a pretty substantial branes or guarantee to come here again ended by the property of the company of the property of the Southern route, as it is called the Court of the Polica of the world was about 1400 of Neillo McHenry with the boom the Southern route, as it is called the company of the property of the start of the two years that I have run the New Park I have doen all possible for the comfort of my patrons. City Atterney Adams has practically completed the drawing up of the contract for the city's purchase of the new city hall sile. The committee has not yet formally nuthorized me to send it Least for Bishop Morris to sign,' he said yester day 'but such will I presume be the action decided upon Miss Rediney, the vice principal of St Hiden's hall, which the dishop's agent makes a statement which may possibly after the situation somewhat She sois that they could not give possession until the lith of June the date of the term's closing. However, I do not know as we would be ready to lay a foundation before that time. Plan's have to be drawn up and considered, and all such movements, where so many are to be consulted as must be in a malter coming up for action before a body like the city council trike considerable time to arrange satisfactorily by understanding is that the contract will be sent hast at our for Bishop Morris to sign.' at Gordray's.

It was a large and on the whole a patient aulience which sat waiting with in the walls of the
New Park Theater last evening from long I cfore
4 o'clock until quite i to gee the distinguished acfor, Mr. Frank Maye, in his superb impersor stion
of Waldemar Nordeck. On account 10 if the late
ness of the train from 'San Francisca', which was
many hours behind time, it was quite nine when
the curtain was runn up on the first act. As the
play progressed the a disnoce was richly repaid for
their walting.

"Nordeck' as a play is an idy! In construction
it is strong, each act anding with a highly dramake climar, the nich is intensely interesting and
the dialogue moyes dong with a smoothniss bediting the high-plan upon which the story is
keyed. The plot in brief, has already been outined in these columns, and it only remains to
say finity in interest ineyer flags until the last
word of the play is spoken.
